CONSOLIDATED FINANCIAL STATEMENTS
AND REPORT OF INDEPENDENT ACCOUNTANTS
DECEMBER 31, 2015 AND 2014**

Draft Only

REPORT OF INDEPENDENT ACCOUNTANTS

PWCR15000244

To the Board of Directors and Stockholders of GCS Holdings, Inc.

We have audited the accompanying consolidated balance sheets of GCS Holdings, Inc. and its subsidiaries (the “Group”) as of December 31, 2015 and 2014, and the related consolidated statements of income, of changes in equity and of cash flows for the years ended December 31, 2015 and 2014, expressed in thousands of New Taiwan dollars. These consolidated financial statements are the responsibility of the Group’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the “Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants” and generally accepted auditing principles in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of GCS Holdings, Inc. and its subsidiaries as of December 31, 2015 and 2014, and the results of their financial performance and their cash flows for the years ended December 31, 2015 and 2014 in conformity with the “Rules Governing the Preparation of Financial Statements by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission of the Republic of China.

March 2, 2016

.....
The accompanying consolidated financial statements are not intended to present the financial position and results of operations and cash flows in accordance with accounting principles generally accepted in countries and jurisdictions other than the Republic of China. The standards, procedures and practices in the Republic of China governing the review of such financial statements may differ from those generally accepted in countries and jurisdictions other than the Republic of China. Accordingly, the accompanying consolidated financial statements and report of independent accountants are not intended for use by those who are not informed about the accounting principles or review standards generally accepted in the Republic of China, and their applications in practice.

GCS HOLDINGS, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2015 AND 2014
(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS,
EXCEPT AS OTHERWISE INDICATED)

1. HISTORY AND ORGANIZATION

GCS Holdings Inc. (the “Company”) was incorporated in Cayman Islands on November 30, 2010, as a holding company for the purpose of registering its shares with the Taipei Exchange (formerly GreTai Securities Market). The Company issued new shares in exchange for 100% of Global Communication Semiconductors, Inc.’s outstanding shares at the exchange ratio of 1:5 on December 28, 2010. After the reorganization, the Company became the parent company of Global Communication Semiconductors, LLC (GCS LLC). The name of Global Communication Semiconductors, Inc. was changed to Global Communication Semiconductors, LLC. in January 2011. The Company was approved by the Financial Supervisory Commission to be listed on the Taipei Exchange. The Company's common shares have been traded on the Taipei Exchange since September 15, 2014.

The Company and its subsidiary (collectively referred herein as the “Group”) engage in the manufacturing of GaAs wafer and provide GaAs foundry related services.

2. THE DATE OF AUTHORIZATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORIZATION

These consolidated financial statements were authorised for issuance by the Board of Directors on March 2, 2016.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRSs”) as endorsed by the Financial Supervisory Commission (“FSC”)

According to Financial Supervisory-Securities-Auditing No. 1030010325 issued by FSC on April 3, 2014, commencing 2015, companies with shares listed on the TWSE or traded on the Taipei Exchange or Emerging Stock Market shall adopt the 2013 version of IFRS (not including IFRS 9, ‘Financial instruments’) as endorsed by the FSC and Regulations Governing the Preparation of Financial Reports by Securities Issuers effective January 1, 2015 (collectively referred herein as the “2013 version of IFRS”) in preparing the consolidated financial statements. The impact of adopting the 2013 version of IFRS is listed below:

A. IAS 1, ‘Presentation of financial statements’

The amendment requires entities to separate items presented in OCI classified by nature into two groups on the basis of whether they are potentially reclassifiable to profit or loss subsequently when specific conditions are met. If the items are presented before tax then the tax related to each of the two groups of OCI items (those that might be reclassified and those that will not be reclassified) must be shown separately. Accordingly, the Group has adjusted its presentation of the statement of comprehensive income.

B. IFRS 13, 'Fair value measurement'

The standard defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The standard sets out a framework for measuring fair value from market participants' perspective, and requires disclosures about fair value measurements. For non-financial assets only, fair value is determined based on the highest and best use of the asset. Based on the Group's assessment, the adoption of the standard has no significant impact on its consolidated financial statements, and the Group has disclosed additional information about fair value measurements accordingly.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

None.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the 2013 version of IFRSs as endorsed by the FSC:

Improvements to IFRSs 2011-2013	July 1, 2014
Improvements to IFRSs 2012-2014	January 1, 2016

The Group is assessing the potential impact of the new standards, interpretations and amendments above. The impact will be disclosed when the assessment is complete.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the “Regulations Governing the Preparation of Financial Statements by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”).

(2) Basis of preparation

- A. Except for the available-for-sale financial assets measured at fair value, the consolidated financial statements have been prepared under the historical cost convention.
- B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

- (a) All subsidiaries are included in the Group’s consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
- (b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiary have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

B. Subsidiaries included in the consolidated financial statements:

Name of investor	Name of subsidiary	Main business activities	Ownership (%)	
			December 31, 2015	December 31, 2014
The Company	Global Communication Semiconductors, LLC	GaAs wafer and foundry services	100%	100%

Name of investor	Name of subsidiary	Main business activities	Ownership (%)	
			December 31, 2015	December 31, 2014
The Company	Global Device Technologies, Co., Ltd.	Product design and research development services	100% (Note)	-

Note: Global Device Technologies, Co., Ltd. was established on April 23, 2015.

- C. Subsidiaries not included in the consolidated financial statements: None.
- D. Adjustments for subsidiaries with different balance sheet dates: None.
- E. Significant restrictions: None.
- F. Subsidiaries that have non-controlling interests that are material to the Group: None.

(4) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The Company's functional currency is United States dollars; however, the consolidated financial statements are presented in New Taiwan dollars in accordance with the regulations of the country where the consolidated financial statements are reported to the regulatory authorities.

A. Foreign currency transactions and balances

- (a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.
- (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.
- (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
- (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within 'other gains and losses'.

B. Translation of foreign operations

The operating results and financial position of all the group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
- (b) Income and expenses for each statement of comprehensive income are translated at average

exchange rates of that period; and

(c) All resulting exchange differences are recognised in other comprehensive income.

(5) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
- (a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;
 - (b) Assets held mainly for trading purposes;
 - (c) Assets that are expected to be realised within twelve months from the balance sheet date;
 - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
- (a) Liabilities that are expected to be paid off within the normal operating cycle;
 - (b) Liabilities arising mainly from trading activities;
 - (c) Liabilities that are to be paid off within twelve months from the balance sheet date;
 - (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(7) Available-for-sale financial assets

- A. Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories.
- B. On a regular way purchase or sale basis, available-for-sale financial assets are recognised and derecognised using trade date accounting.
- C. Available-for-sale financial assets are initially recognised at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognised in other comprehensive income. Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured or derivatives that are linked to and must be settled by delivery of such unquoted equity instruments are presented in 'financial assets measured at cost'.

(8) Accounts receivable

Accounts receivable are loans and receivables originated by the entity. They are created by the entity by selling goods or providing services to customers in the ordinary course of business. Accounts receivable are initially recognised at fair value and subsequently measured at amortized

cost using the effective interest method, less provision for impairment. However, since the short-term accounts receivable bear no interest, considering the discounting effects would not be significant, the Group subsequently measures those receivables at the invoice amount.

(9) Impairment of financial assets

A. The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

B. The criteria that the Group uses to determine whether there is objective evidence of an impairment loss is as follows:

(a) Significant financial difficulty of the issuer or debtor; and

(b) It becomes probable that the borrower will enter bankruptcy or other financial reorganization.

C. When the Group assesses that there has been objective evidence of impairment and an impairment loss has occurred, accounting for impairment is made as follows according to the category of financial assets:

(a) Financial assets measured at amortised cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate, and is recognised in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset does not exceed its amortised cost that would have been at the date of reversal had the impairment loss not been recognised previously. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(b) Available-for-sale financial assets

The amount of the impairment loss is measured as the difference between the asset's acquisition cost (less any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognised in profit or loss, and is reclassified from 'other comprehensive income' to 'profit or loss'. If, in a subsequent period, the fair value of an investment in a debt instrument increases, and the increase can be related objectively to an event occurring after the impairment loss was recognised, then such impairment loss is reversed through profit or loss. Impairment loss of an investment in an equity instrument recognised in profit or loss shall not be reversed through profit or loss. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(10) Derecognition of financial assets

The Group derecognises a financial asset when the contractual rights to receive the cash flows from the financial asset expire.

(11) Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the

first-in, first-out (FIFO) method. The cost of finished goods and work in process comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(12) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. Property, plant and equipment apply cost model. Land is not depreciated and other property, plant and equipment are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each significant part of an item of property, plant and equipment is required to be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each balance sheet date. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change.

The estimated useful lives of property, plant and equipment are as follows:

Buildings	35 years
Machinery and equipment	7 years
Computer and communication equipment	5 years
Research equipment	7 years
Office equipment	7 ~10 years
Leased assets	7 years
Leasehold improvements	6 years

(13) Leased assets/leases (lessee)

- A. Based on the terms of a lease contract, a lease is classified as a finance lease if the Group assumes substantially all the risks and rewards incidental to ownership of the leased asset.
 - (a) A finance lease is recognised as an asset and a liability at the lease's commencement at the lower of the fair value of the leased asset or the present value of the minimum lease payments.
 - (b) The minimum lease payments are apportioned between the finance charges and the reduction of the outstanding liability. The finance charges are allocated to each period over the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.
 - (c) Property, plant and equipment held under finance leases are depreciated over their estimated

useful lives. If there is no reasonable certainty that the Group will obtain ownership at the end of the lease, the asset shall be depreciated over the shorter of the lease term and its useful life.

- B. An operating lease is a lease other than a finance lease. Payments made under an operating lease are recognised in profit or loss on a straight-line basis over the lease term.

(14) Intangible assets

Computer software is stated at cost and amortized on a straight-line basis over its estimated useful life of 1 to 5 years.

(15) Impairment of non-financial assets

The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. When the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist, the impairment loss shall be reversed to the extent of the loss previously recognised in profit or loss.

(16) Notes and accounts payable

Notes and accounts payable are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. They are recognised initially at fair value and subsequently measured at amortized cost using the effective interest method. However, since the short-term accounts payable bear no interest, considering the discounting effects would not be significant, the Group subsequently measures those payables at the invoice amount.

(17) Financial liabilities at fair value through profit or loss

A. Financial liabilities at fair value through profit or loss are financial liabilities held for trading or financial liabilities designated as at fair value through profit or loss on initial recognition. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:

- (a) Hybrid (combined) contracts; or
- (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
- (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.

B. Financial liabilities at fair value through profit or loss are initially recognised at fair value. Related transaction costs are expensed in profit or loss. These financial liabilities are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial liabilities are recognised in profit or loss.

(18) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(19) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when

there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(20) Financial liabilities

Bonds payable

Convertible corporate bonds issued by the Group contain conversion options (that is, the bondholders have the right to convert the bonds into the Group's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Group classifies the bonds payable and derivative features embedded in convertible corporate bonds on initial recognition as a financial asset, a financial liability or an equity instrument ('capital surplus-stock warrants') in accordance with the substance of the contractual arrangement and the definitions of a financial asset, a financial liability and an equity instrument. Convertible corporate bonds are accounted for as follows:

- (a) Call options and put options embedded in convertible corporate bonds are recognised initially at net fair value as 'financial assets or financial liabilities at fair value through profit or loss'. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognised as 'gain or loss on valuation of financial assets or financial liabilities at fair value through profit or loss'.
- (b) Bonds payable of convertible corporate bonds is initially recognised at fair value and subsequently stated at amortised cost. Any difference between the proceeds and the redemption value is accounted for as the premium or discount on bonds payable and presented as an addition to or deduction from bonds payable, which is amortised in profit or loss as an adjustment to the 'finance costs' over the period of bond circulation using the effective interest method.
- (c) Any transaction costs directly attributable to the issuance of convertible corporate bonds are allocated to the liability and equity components in proportion to the allocation of proceeds.
- (d) When bondholders exercise conversion options, the liability component of the bonds (including 'bonds payable and 'financial assets or financial liabilities at fair value through profit or loss') shall be remeasured on the conversion date. The book value of common shares issued due to the conversion shall be based on the adjusted book value of the above-mentioned liability component.

(21) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expenses in that period when the employees render service.

B. Pensions

Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expenses when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

C. Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of employment as a result from either the Group's decision to terminate an employee's employment

before the normal retirement date, or an employee's decision to accept an offer of redundancy benefits in exchange for the termination of employment. The Group recognises termination benefits when it is demonstrably committed to a termination, when it has a detailed formal plan to terminate the employment of current employees and when it can no longer withdraw the plan.

D. Employees' and directors' remuneration

Employees' and directors' remuneration are recognised as expenses and liabilities, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is distributed by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(22) Employee share-based payment

A. For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognised is based on the number of equity instruments that eventually vest.

B. Restricted stocks

- (a) Restricted stocks issued to employees are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period.
- (b) For restricted stocks where those stocks do not restrict distribution of dividends to employees and employees are not required to return the dividends received if they resign during the vesting period, the Group recognises the fair value of the dividends received by the employees who are expected to resign during the vesting period as compensation cost at the date of dividends declaration.

(23) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiary operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities.
- C. Deferred tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. Deferred tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference

is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

D. Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognised and recognised deferred tax assets are reassessed.

E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

(24) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(25) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(26) Revenue recognition

A. Sales of goods

The Group engages in manufacturing of GaAs wafer and providing GaAs foundry related services. Revenue is measured at the fair value of the consideration received or receivable taking into account value-added tax, returns, rebates and discounts for the sale of goods to external customers in the ordinary course of the Group's activities. Revenue arising from the sales of goods should be recognised when the Group has delivered the goods to the customer, the amount of sales revenue can be measured reliably and it is probable that the future economic benefits associated with the transaction will flow to the entity. The delivery of goods is completed when the significant risks and rewards of ownership have been transferred to the customer, the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, and the customer has accepted the goods based on the sales contract or there is objective evidence showing that all acceptance provisions have been satisfied.

B. Service revenue and royalty income

Service revenue and royalty income are recognised when it is probable that future economic benefits will flow to the entity and these benefits can be measured reliably. The revenue is accounted for under the accrual basis.

(27) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The Group's chief operating decision-maker, who is responsible for

allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

5. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgments in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the related information is addressed below:

(1) Critical judgments in applying the Group's accounting policies

None.

(2) Critical accounting estimates and assumptions

The Group makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below:

A. Realizability of deferred tax assets

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilized. Assessment of the realizability of deferred tax assets involves critical accounting judgments and estimates of the management, including the assumptions of expected future sales revenue growth rate and profit rate, tax exempt duration, available tax credits, tax planning, etc. Any variations in global economic environment, industrial environment, and laws and regulations might cause material adjustments to deferred tax assets.

As of December 31, 2015, the Group recognised deferred tax assets amounting to \$203,951.

B. Evaluation of inventories

As inventories are stated at the lower of cost and net realizable value, the Group must determine the net realizable value of inventories on balance sheet date using judgments and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realizable value. Such an evaluation of inventories is principally based on the selling prices. Therefore, there might be material changes to the evaluation.

As of December 31, 2015, the carrying amount of inventories was \$331,800.

6. DETAILS OF SIGNIFICANT ACCOUNTS

(1) Cash and cash equivalents

	<u>December 31, 2015</u>	<u>December 31, 2014</u>
Cash on hand and petty cash	\$ 116	\$ 63
Checking accounts and demand deposits	1,024,784	133,525
Cash equivalents – money market fund	<u>212,613</u>	<u>393,797</u>
	<u>\$ 1,237,513</u>	<u>\$ 527,385</u>

A. The Group transacts with a variety of financial institutions all with high credit quality to disperse credit risk and expects that the probability of counterparty default is remote. The Group's maximum exposure to credit risk at balance sheet date is the carrying amount of all cash and cash equivalents.

B. The Group has no cash and cash equivalents pledged to others.

(2) Available-for-sale financial assets

There were no available-for-sale financial assets as of December 31, 2014.

	<u>December 31, 2015</u>
Non-current items:	
Listed stocks	\$ 8,206
Emerging stocks	<u>43,140</u>
Subtotal	51,346
Valuation adjustment	<u>1,133</u>
	<u>\$ 52,479</u>

The Group recognised \$1,133 in other comprehensive income for fair value change for the year ended December 31, 2015.

(3) Accounts receivable, net

	<u>December 31, 2015</u>	<u>December 31, 2014</u>
Accounts receivable - third parties	\$ 207,645	\$ 194,406

Group 3	<u>7,153</u>	<u>4,353</u>
	<u>\$ 170,989</u>	<u>\$ 164,382</u>

Group 1 : Annual sales transactions exceed US\$ 2.5 million.

Group 2 : Annual sales transactions exceed US\$ 100 thousand, but less than US\$ 2.5 million.

Group 3 : Annual sales transactions below US\$ 100 thousand.

B. The aging analysis of accounts receivable that were past due but not impaired is as follows:

	<u>December 31, 2015</u>	<u>December 31, 2014</u>
Up to 30 days	\$ 31,530	\$ 21,105
31 to 60 days	1,109	4,009

	<u>\$ 32,639</u>	<u>\$ 26,273</u>

C. Analysis of movement of impaired accounts receivable:

(a) As of December 31, 2015 and 2014, the Group's accounts receivable that were impaired all amounted to \$0.

(b) Movements on the Group's provision for impairment of accounts receivable are as follows:

	<u>2015</u>	<u>2014</u>
At January 1	\$ -	\$ 48,635
Provision for impairment	1,407	-
Write-offs during the period	(383)	(49,452)
Unwinding of discount and premium	(1,024)	-
Exchange effects	<u>-</u>	<u>817</u>
At December 31	<u>\$ -</u>	<u>\$ -</u>

D. The Group does not hold any collateral as security.

(4) Inventories

	<u>\$ 299,245</u>	<u>(\$ 27,755)</u>	<u>\$ 271,490</u>

Expense and cost incurred on inventories for the years ended December 31, 2015 and 2014 were as follows:

	<u>For the years ended December 31,</u>	
	<u>2015</u>	<u>2014</u>
Cost of inventories sold	\$ 939,134	\$ 855,942

- A. According to the Articles of Incorporation of the Company, when distributing earnings, the Company shall distribute no more than 15% and no less than 5% as employees' bonus, and no more than 2% as directors' remuneration.
- B. However, in accordance with the Taiwan Company Act amended on May 20, 2015, a company shall distribute employee remuneration, based on the current year's profit condition, in a fixed amount or a proportion of profit. If a company has accumulated deficit, earnings should be channeled to cover losses. Aforementioned employee remuneration could be paid by cash or stocks. Specifics of the compensation are to be determined in a board meeting that registers two-thirds of directors in attendance, and the resolution must receive support from half of participating members. The resolution should be reported to the shareholders' meeting. Qualification requirements of employees, including the employees of subsidiaries of the Company meeting certain specific requirements, entitled to receive aforementioned stock or cash may be specified in the Articles of Incorporation. The board of directors of the Company has approved the amended Articles of Incorporation of the Company on November 5, 2015. According to the amended articles, a ratio of profit of the current year distributable, after covering accumulated losses, shall be distributed as employees' compensation and directors' remuneration. The ratio shall be no more than 15% and no less than 5% as employees' compensation, and no more than 2% as directors' remuneration. The amended articles will be resolved in the shareholders' meeting in 2016.
- C. For the years ended December 31, 2015 and 2014, employees' compensation (bonus) was accrued at \$15,702 and \$6,077, respectively; directors' remuneration was accrued at \$6,281 and \$2,279, respectively. The aforementioned amounts were recognized in cost of goods sold and salary expenses, respectively. The employees' compensation and directors' remuneration were estimated and accrued based on 5% and 2% of profit of current year distributable for the year ended December 31, 2015. The expenses recognised for the year of 2014 were accrued based on the net income of 2014 and the percentage 5% and 2% for employees and directors, respectively, taking into account other factors such as legal reserve. Where the accrued amounts for employees' bonus and directors' remuneration are different from the actual distributed amounts as resolved by the stockholders at their stockholders' meeting subsequently, the differences are

accounted for as changes in estimates. Employees' bonus and directors' remuneration of 2014 as resolved by the shareholders' meeting were in agreement with those amounts recognised in the profit or loss of 2014.

- D. Information about employees' compensation and directors' remuneration of the Company as proposed by the Board of Directors and resolved by the shareholders will be posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.

None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

The appropriations of 2015 earnings had been resolved by the Board of Directors on March 2, 2016. Please refer to Note 6(15).

12. OTHERS

(1) Capital risk management

In order to safeguard the Group's ability to adapt to the changes in the industry and to accelerate the new product development, the Group's objectives when managing capital are to maintain the sufficient financial resources to support the operating capital, capital expenditures, research and development activities and dividend paid to shareholders, etc.

(2) Financial instruments

- A. (a) The carrying amounts measured at amortized cost approximate to the fair values of the Group's financial instruments, including cash and cash equivalents, accounts receivable, other receivables, other current assets, accounts payable, other payables and accrued rent expense (accounted for under 'Other current liabilities' and 'Other non-current liabilities'). The fair value information of financial instruments measured at fair value is provided in Note 12(3).

		<u>Fair value</u>		
		<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
Bonds payable	\$ 457,386	\$ -	\$ 457,386	\$ -

No convertible bonds were issued and outstanding as of December 31, 2014.

- (b) The methods and assumptions of fair value measurement are as follows:

Convertible debentures payable: Regarding the convertible bonds issued by the Group, the fair value is estimated using Binominal Model.

B. Financial risk management policies

- a) The Group's activities expose it to a variety of financial risks: market risk (including interest risk and price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial position and financial performance.
- b) Risk management is carried out by a central treasury department (Group treasury) under policies approved by the Board of Directors. Group treasury identifies, evaluates and hedges financial risks in close cooperation with the Group's operating units.

C. Significant financial risks and degrees of financial risks

a) Market risk

Foreign exchange risk

- The Group's businesses are mainly conducted in its functional currency. Therefore, the foreign exchange risk is deemed minimal.

Price risk

- i. The Group is exposed to equity securities price risk because of investments held by the Group and classified on the consolidated balance sheet as available-for-sale financial assets. The Group is not exposed to commodity price risk.
- ii. The Group's investments in equity securities comprise domestic emerging stocks and foreign listed stocks. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 10% with all other variables held constant, post-tax profit would have increased/decreased by \$5,248.

Interest rate risk

- The Group is not exposed to interest rate risk since it has no borrowings issued at variable rates.

b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. According to the Group's credit policy, each local entity in the Group is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Board of Directors. The utilization of credit limits is regularly monitored. Credit risk arises from cash and cash equivalents, and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transactions.
- ii. As of December 31, 2015 and 2014, the Group's maximum credit risk exposure is mainly from the carrying amount of financial assets recognised in the consolidated balance sheet.
- iii. The financial assets that are neither past due nor impaired are accounts receivable. Please refer to Note 6(3).
- iv. The financial assets that were past due but not impaired are accounts receivable. Please refer to Note 6(3).
- v. The financial assets with impairment are accounts receivable. Please refer to Note 6(3).

c) Liquidity risk

- i. Cash flow forecasting is performed by the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure the Group has sufficient cash to meet operational needs. Such forecasting takes into consideration the Group's debt financing plans, compliance with internal balance sheet ratio targets and, if applicable external regulatory or legal requirements.
- ii. Surplus cash held by the operating entities over and above balance required for working capital management are transferred to the Group treasury. Group treasury chooses instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the above mentioned forecasts.

iii. The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(3) Fair value information

A. Details of the fair value of the Group's financial assets and financial liabilities not measured at fair value are provided in Note 12(2)A.

B. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted in active markets for identical assets or liabilities that the entity can access at the measurement date.) A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

- C. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at December 31, 2015, is as follows:

December 31, 2015	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets				
<u>Recurring fair value measurements</u>				
Available-for-sale financial assets				
Equity securities	\$ <u>52,479</u>	\$ <u>-</u>	\$ <u>-</u>	\$ <u>52,479</u>
Liabilities				
<u>Recurring fair value measurements</u>				
Financial liabilities at fair value through profit or loss	\$ <u>-</u>	\$ <u>-</u>	\$ <u>120,164</u>	\$ <u>120,164</u>

There were no recurring financial assets and financial liabilities measured at fair value at December 31, 2014.

- D. The methods and assumptions the Group used to measure fair value are as follows:
- (a) The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:
- | | <u>Listed shares</u> | <u>Emerging stock shares</u> |
|---------------------|----------------------|------------------------------|
| Market quoted price | Closing price | Average trading price |
- (b) When assessing non-standard and low-complexity financial instruments, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
- E. For the year ended December 31, 2015, there was no transfer between Level 1 and Level 2 financial instruments.
- F. The following chart is the movement of Level 3 financial instruments for the year ended December 31, 2015:

	<u>Financial liabilities at fair value through profit or loss</u>
At January 1, 2015	\$ -
Issued in the period	99,354
Converted in the period	(9,703)
Exchange effect	202
Losses recognised in profit or loss	<u>30,311</u>
At December 31, 2015	<u>\$ 120,164</u>

- G. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at December 31, 2015	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Conversion option, redemption option and put option of convertible bonds	\$ 120,164	Binominal model	Expected volatility	56.36%	The higher the volatility, the higher the fair value

- H. The Group has carefully assessed the valuation models and assumptions used to measure fair value; therefore, the fair value measurement is reasonable. However, use of different valuation models or assumptions may result in different measurement. A sensitivity analysis shows that a 7% increase in the value of stock price would lead to a decrease in net income by \$13,848. On the other hand, a 7% decrease in the value of stock price would increase net income by \$15,455. A 10% increase in the value of stock price would lead to a decrease in net income by \$23,171. However, a 10% decrease in the value of stock price would increase net income by \$19,906.

Note: Exclusive of income tax expenditures.

(3) Reconciliation for segment income (loss)

The Company and its subsidiaries engage in a single industry. The chief operating decision-maker assesses performance and allocates resources of the whole group. The Company is regarded as a single operating segment. Therefore, there is no inter-segment revenue. The revenue from external parties reported to the chief operating decision-maker is measured in a manner consistent with that in the statement of comprehensive income. The amount provided to the chief operating decision-maker with respect to total assets is measured in a manner consistent with that in the balance sheet.
